Pb-Free Soldering Alloys
Tin, Silver, Indium, Bismuth, Antimony, Copper, Germanium

According to OSHA Regulation: 29 CFR 1910.1200(g)
Date of issue: May 30, 2015
Version: 1.0

SECTION 1: Chemical product and company identification

1.1 Product Identifier
Product form : Article
Product Name : Pb-Free Soldering Alloys
Tin, Silver, Indium, Bismuth, Antimony, Copper, Germanium - Soldering Alloys, SAC-alloy

1.2. Relevant identified uses of the substance or mixture and uses advised against
1.2.1 Relevant identified uses
Industrial/Professional use spec. : Industrial
For professional use only
Use of the substance/mixture : Soldering
Function or use category : Soldering agent

1.2.2 Uses advised against
No additional information available

1.3. Details of the supplier of the safety data sheet
Coining, Inc.
15 Mercedes Drive
Montvale, NJ 07645
Tel: +1(201)7914020
www.coininginc.com
martin.oud@ametek.com

1.4. Emergency Telephone Number
For Chemical Emergency, Spill, Leak, Fire, Exposure, or Accident, call CHEMTREC-Day of Night.

SECTION 2: Hazards identification

2.1. Classification of the Substances or Mixture
Classification GHS-US: Not classified
Adverse physicochemical, human health and environmental effects:
No additional information available.

2.2. Label Elements
Signal Word: Not applicable
Precautionary Statements
P261 Avoid breathing dust/fume/gas/mist/vapors/spray
P270 Do not eat, drink or smoke when using this product
P273 Avoid release to the environment
P280 Wear protective gloves/protective clothing/eye protection/face protection
P501 Dispose of contents/container in accordance with local, regional, national and international regulations.

2.3. Other hazards: This product is present in a massive form as an alloy. It does not present the same hazards when the individual components are in their powdered form.
SECTION 3: Composition/information on ingredients

3.1. Substances
Not applicable

3.2. Mixture

Full text of H- and P-phrases: see section 16

SECTION 4: First aid measures

4.1. Description of first aid measures

First-aid measures general: Never give anything by mouth to an unconscious person. If you feel unwell, seek medical advice (show there label where possible).

First-aid measures after inhalation: When symptoms occur; go into open air and ventilate suspected area.

First-aid measures after skin contact: Removal of solidified molten material from skin requires medical assistance. Cool skin rapidly with cold water after contact with molten product

First-aid measures after eye contact: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

First-aid measures after ingestion: Rinse mouth. Do NOT induce vomiting.

4.2. Most important symptoms and effects, both acute and delayed

Symptoms/injuries: Under normal conditions of use not expected to present a significant hazard. Under milling, or physical alteration metal dusts may be produced that cause irritation of the respiratory tract, skin, and may be harmful. Molten material may release toxic and irritating fumes.

Symptoms/injuries after inhalation: Not expected to be a primary route of exposure. The primary acute health hazard associated with this product would be the potential for exposure to fumes during metal processing operations. Inhalation of dusts and fumes can cause metal fume fever. Symptoms can include a metallic or sweet taste in the mouth, sweating, shivering, headache, throat irritation, fever, chills, thirstiness, muscle aches, nausea, vomiting, weakness, fatigue, and shortness of breath.

Symptoms/injuries after skin contact: Skin contact is not considered a potential route of exposure. The primary acute health hazard associated with this product would be the potential for exposure to fumes during metal processing operations. Where possible allow molten
material to solidify naturally. Removal of solidified molten material from skin requires medical assistance.

Symptoms/injuries after eye contact: Not expected to be a primary route of exposure. Dust generated from material cutting may cause a slight irritation. Slivers may be generated, which could cause mechanical irritation or injure the eye.

Symptoms/injuries after ingestion: Ingestion is not considered a potential route of exposure.

Chronic symptoms:
- **Tin**: Has been shown to increase incidence of sarcoma in animal tests. Chronic exposure to tin dusts and fume may result in "stannosis", a mild form of pneumoconiosis. **Silver**: Chronic skin contact or ingestion of silver dust, salts or fume can result in a condition known as Argyria, a condition with bluish pigmentation of the skin and eyes. **Antimony**: Exposure to dusts and fumes may result in irritation eyes, skin, nose, throat, mouth; cough; dizziness; fainting; dyspnea (breathing difficulty); nausea, vomiting, diarrhea, stomach cramps; insomnia; anorexia; unable to smell properly. **Copper**: Overexposure to fumes may cause metal fume fever (chills, muscle aches, nausea, fever, dry throat, cough, weakness, and lassitude); metallic or sweet taste; discoloration of skin and hair. Tissue damage of mucous membranes may follow chronic dust exposure.

### 4.3. Indication of any immediate medical attention and special treatment needed
If medical advice is needed, have product container or label at hand.

## SECTION 5: Fire fighting measures

### 5.1. Extinguishing media
- **Suitable extinguishing media**: Does not burn. Use extinguishing media appropriate for surrounding fire
- **Unsuitable extinguishing media**: None known.

### 5.2. Special hazards arising from the substance or mixture
- **Fire hazard**: Dust, chips, or ribbons can be ignited more easily, by an ignition source, by improper machining, or by spontaneous combustion if finely divided and damp

### 5.3. Advice for firefighters
- **Firefighting instructions**: Exercise caution when fighting any chemical fire.
- **Protection during firefighting**: Do not enter fire area without proper protective equipment, including respiratory protection.

## SECTION 6: Accidental release measures

### 6.1. Personal precautions, protective equipment and emergency procedures
- **General measures**: Handle in accordance with good industrial hygiene and safety practice.

#### 6.1.1. For non-emergency personnel
- **Protective equipment**: Use appropriate personal protection equipment (PPE)
- **Emergency procedures**: Evacuate unnecessary personnel.

#### 6.1.2. For emergency responders
- **Protective equipment**: Equip cleanup crew with proper protection.
Emergency procedures : Ventilate area

6.2. Environmental precautions

Avoid release to the environment

6.3. Methods and material for containment and clean up

For containment : If metal is in molten form, allow cooling and collecting as a solid. If the metal is in solid form collect for remelting purposes.

Methods for cleaning up : Clear up spills. Immediately and dispose of waste safely.

6.4 Reference to other sections

See heading 8, exposure controls and personal protection.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Hygiene measures : Handle in accordance with good industrial hygiene and safety procedures. Wash hands and other exposed areas with mild soap and water before eating, drinking, or smoking and again when leaving work.

7.2. Conditions for safe storage, including any incompatibilities

Storage conditions : Store in a dry, cool and well-ventilated place.

7.3. Specific end use(s)

Soldering.

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

8.2. Exposure controls

Appropriate engineering controls : Ensure adequate ventilation, especially in confined areas.

Personal protective equipment : Protective goggles. Insulated gloves

Hand protection : If material is hot, wear thermally resistant protective gloves.

Eye protection : During metal processing, chemical goggles or safety glasses.

Respiratory protection : During metal processing, wear approved mask.

Other information : When using, do not eat, drink or smoke.

SECTION 9: Physical and chemical properties

9.1. Information on basis physical and chemical properties

Physical state : Solid
Appearance : Preforms, squares, rings, discs
Color : Metallic
Odor : Odorless
Odor threshold : Not applicable
pH : Neutral
Relative evaporation rate (butylacetate=1) : Not applicable
Melting point : No data available
Freezing point : No data available
Boiling point : No data available
Flash point : No data available
Self ignition temperature : No data available
Decomposition temperature : No data available
Flammability (solid, gas) : No data available
Vapor pressure : No data available
Relative vapor pressure at 20°C : No data available
Relative density : No data available
Solubility : Insoluble
Log Pow : No data available
Log Kow : No data available
Viscosity, kinematic : No data available
Viscosity, dynamic : No data available
Explosive properties : No data available
Oxidizing properties : No data available
Explosive limits : No data available

9.2 Other information
No other information available

SECTION 10: Stability and reactivity

10.1 Reactivity
Hazardous reactions will not occur under normal conditions.

10.2 Chemical stability
Stable under normal conditions. Dust, chips or ribbons can be ignited more easily, by an ignition source, by improper machining, or by spontaneous combustion if finely divided and damp.

10.3 Possibility of hazardous reactions
Hazardous polymerization will not occur.

10.4 Conditions to avoid
Direct sunlight. Extremely high or low temperatures.

10.5 Incompatible materials

10.6. Hazardous decomposition products
Metal oxides.

SECTION 11: Toxicological information

11.1 Information on toxicological effects
Acute toxicity : Not classified

Silver (7440-22-4)
LD50 oral rat >2000 mg/kg

Antimony (7440-36-0)
LD50 oral rat 100 mg/kg

Irritation : Not classified
Corrosivity : Not classified
Sensitization: Not classified
Repeated dose toxicity: Not classified
Carcinogenicity: Not classified
Mutagenicity: Not classified
Toxicity for reproduction: Not classified

SECTION 12: Ecological information

12.1 Toxicity

12.2 Persistence and degradability

| Soldering Alloys | Persistence and degradability | Not established |

| Copper (7440-50-8) | Persistence and degradability | Not readily biodegradable. |

12.3 Bioaccumulative potential

| Soldering Alloys | Bioaccumulative potential | Not established |

12.4 Mobility in soil

No additional information available.

12.5 Results of PBT and vPvB assessment

No additional information available.

12.6 Other adverse effects
Other information: Avoid release to the environment.

SECTION 13: Disposal information

13.1 Waste treatment methods

Waste disposal recommendations: Scrap metal alloy usually has value. Contact commercial reclaimer for recycling. Otherwise, dispose of waste material in accordance with all local, regional, national and international regulations.

SECTION 14: Transport information

14.2. In Accordance with IMDG: Not regulated for transport.

14.3. In Accordance with IATA: Not regulated for transport.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

15.1.1. US Federal Regulations: All ingredients are listed on the EPA TSCA Inventory.

Copper/Copper Alloys
